

The Building Clouds Advantage

Cost Effective – Real-Time – Real Control

Simply Connect

Easy to install, easy to connect, big savings, low cost components, wireless communication, enterprise grade energy management server, monitor and control building systems from PCs, tablets, and smartphones.

Save on installation labor by placing strati-fi throughout a facility, allow them to attach to your Wi-Fi network, connect your existing building control system or add Building Clouds intelligent controllers.

With "Phone Home" IT Friendly Technology

Perfect for any size building

strati-fi controllers are part of the **Building Clouds Energy Management & Control Platform**. Built on advanced communication protocols each strati-fi automatically makes an out-bound connection to our **Opendiem Software Suite** running on secure servers in the cloud or at your facility.

Combine Multiple Protocols

With Opendiem you can combine multiple control protocols into a single cohesive system. Integrate **LonWorks, Bacnet, Modbus, OPC**, and other **legacy systems** all on the same server.

Complete Connected Systems
